

DR46® | MOTORCYCLIST PROTECTION

- SIGNIFICANTLY REDUCES INJURIES AND FATALITIES TO MOTORCYCLISTS
- ALLOWS FOR A CURVE RADIUS AS LOW AS 25 M
- IDEAL FOR CONTEXT SENSITIVE DESIGN APPLICATIONS

PHYSICAL SPECIFICATIONS

Classification	Motorcyclist Protection
Length	3 m
Width	215 mm
Height	330 mm

DESIGNED TO MAKE GUARDRAIL SAFER FOR MOTORCYCLISTS

The DR46 Motorcyclist Protection is designed to be attached to standard roadside guardrail to protect errant motorcyclists from the guardrail post during a fall or collision. The use of the DR46 reduces the risk of the motorcyclist impacting dangerous guardrail posts. The DR46 is easy to install with a simple connection to guardrail. It can decrease the injury and fatality rates of motorcycle accidents without interfering with guardrail performance. The DR46 has passed the test with the small car EN1317-2.

FREQUENTLY ASKED QUESTIONS

How long does it take to install the DR46 Motorcycle Protection?

An experienced four person crew with the proper tools should be able to install 100 m of DR46 modules in 15 minutes.

Can the DR46 be used in curves?

Yes, the DR46 can be installed in curves with radius as low as 25m.

What type of safety barriers can the DR46 be attached to?

The DR46 easily attaches to most popular shapes and heights, with or/without blockouts, of NCHRP 350, Mash and EN 1317 approved steel guardrail.

Does the DR46 affect the performance of the guardrail?

No when properly installed, the DR46 does not affect performance of the guardrail.

FEATURES

- » Significantly reduces injuries and fatalities to motorcyclists
- » Attenuator absorbs energy and redirects the impacting motorcyclist by preventing the motorcyclist from impacting guardrail posts
- » Allows for a curve radius as low as 25 m
- » Ideal for context sensitive design applications
- » Tested according the the Spanish standard UNE 135900-1 and 2

WHERE TO USE

The DR46 is simple to install. Cable ties secure the barrier to guardrail posts without impeding guardrail performance.
